

前言

澳門生產力暨科技轉移中心(簡稱：生產力中心)的宗旨之一是，推動本澳各個專業領域的管理水平與國際接軌，進一步提升本地業界的整體素質與區域競爭力。然而提升地區管理水平的最佳方法與捷徑，莫過於幫助下一代從小建立起生活管理的重要概念。

『兒童環保行動』是生產力中心將管理的核心精神，運用環保與教育等現代工具，及早往下一代紮根，幫助下一代在起跑點上與國際接軌的有效管理學習活動。兒童環保行動強調的是透過愛護環境的熱門議題，把生產力中心在ISO14000環保專業領域的管理概念，融入兒童與少年的學習，以期幫助他們建立正確的管理概念與自身行為的責任感，將系統管理的氛圍散播在不同年齡層的培训計劃。

FOREWORD

One of CPTTM's missions is to promote Macao's management standard to international par as well as closing the gap in between, so that the overall quality and competitiveness of local industries will be upgraded in the long run. The best and fastest means to achieve this goal, however, is undoubtedly by conveying the key concept of life management to the rising generations.

The EnviroKids Program, a set of extra-curricular activities using environmental issues to expound the core spirit of effective management, is what CPTTM undertakes to help Macao's youngsters to elevate to international class. In the Program, CPTTM's long-promoted ISO 14000 environmental management concepts will be incorporated to forge the right idea of management and a deep sense of responsibility in behavior in children. The EnviroKids Program is thereby a training program meticulously formulated to expose different age groups of young people to the world of systematic management.
